Hybrid **Paralegal / Software Engineer** for Colorado law firms — one hire who does substantive paralegal work **and** handles the firm's technology, so there's no separate IT hire. A software developer of 10+ years (most recently .NET enterprise applications), now about halfway through Colorado paralegal coursework. Bilingual English / Spanish.

EXPERIENCE

.NET Developer — Augeo Mar 2024 — Mar 2026 · Remote

◆ Developed and maintained .NET enterprise applications for loyalty and engagement platforms; delivered scalable features with cross-functional teams.

Software Developer — Davis Graham & Stubbs LLP Mar 2022 — Feb 2024 · Denver, CO

◆ Built and maintained internal legal software for one of Colorado's largest law firms; delivered full-stack web and back-end features with a focus on reliability and accuracy.

Software Developer — Denver Coder (freelance) Jun 2021 — Apr 2022 · Denver, CO

◆ Delivered contract software projects for local businesses across a variety of tech stacks.

Full-Stack Developer — Envision Radiology Aug 2019 — May 2021 · Colorado Springs, CO

◆ Built and maintained full-stack web applications for radiology clinic operations; improved data workflows and internal tooling.

Software Engineer IV — JBS Oct 2018 — May 2019 · Greeley, CO

◆ Contributed to enterprise-scale internal software for one of the world's largest food processors.

Software Engineer II — FRONTSTEPS Oct 2015 — Apr 2018 · Glendale, CO

◆ Led SaaS products for HOA and property management, including two cross-platform mobile apps (iOS & Android) in Xamarin, taken from conception to launch.

Jr. C#/.NET Developer — Fetter Logic, Inc. Apr 2014 — Oct 2015 · Denver, CO

◆ Built C# data-mapping pipelines (UI → database → PDF) and internal automation tools that eliminated hundreds of hours of manual work.

SELECTED PROJECT

Private, on-device document tool — built a working tool that turns medical records into an attorney-ready chronology entirely on local hardware, with no client data leaving the machine. A sample of the kind of in-house tooling I build.

SKILLS

ENGINEERING

C# / .NET Full-stack web JavaScript SQL
Xamarin (iOS/Android) Document automation

LEGAL & PARALEGAL

Medical chronologies Records requests Discovery organization
Filing calendars
